

Why choose Drainsafe® Drain Covers?

We'll give you 10 reasons.

10. APPROVED BY THE STATE OF FLORIDA

ASME/ANSI A112.19.8 b 2008 standard compliant. Drainsafe® was recertified and NOT part of the CPSC recall. Drainsafe® is APPROVED, providing peace of mind for Everyone.

9. POOL CLEANER FRIENDLY

Drainsafe® drain covers will not interfere with any automated pool cleaners that are operating via manufactures instructions.

8. WALL OR FLOOR INSTALLATION

The DS 360 Series is suitable for wall or floor suction outlet installations, with exactly the same safe flow rating of 123 GPM @ 1.5 FPS

7. LARGE OPEN AREA

The DS 360 Series is hydraulically sound. The 27 square inch large open area, minimizes the differential hold down forces in a multiple drain system. Slower flow rate means less velocity and ultimately safer pool and spa suction outlets.

6. SPECIALLY DESIGNED, STAINLESS STEEL SECURITY SCREWS

The DS 360 Series is supplied with 12-316 grade stainless steel screws and a special installation tool which is designed to greatly reduce the potential for tampering. The four points of attachment ensures a secure installation.

5. UNIVERSAL FIT

One cover fits all! Eliminates the need to stock more than one drain cover, removes confusion for the pool owner as to which cover they need, saves time at the counter and optimizes space on the work truck.

4. UV PROTECTED AND CHEMICAL RESISTANT RIGID PVC MATERIAL

Most drain covers degrade in chlorinated water or from sun exposure. Drainsafe® drain covers are UV protected and chemical resistant PVC material, reduces potential damage and extends product life.

3. DS 360 SERIES HAS A CERTIFIED FLOW RATE OF 123 GPM @ 1.5 FPS

It meets or exceeds all industry standards.

Note: Never exceed the posted flow rate of any suction outlet cover.

2. SAFEST DRAIN COVER, PERIOD.

The Drainsafe® difference is obvious. The patented design precludes hair, jewelry, clothing, and limb entrapment. The large open area and domed design greatly reduces potential for entrapment.

1. DRAINSAFE® SAVES LIVES!

Be a part of the solution to make all pools and spas safer and help save lives. Choosing Drainsafe® drain cover reduces potential liability and offers the ultimate peace of mind by following manufactures installation instructions.
